- ✓ Bootstrap
- ✓ Jest
- ✓ C#

ABOUT ME

Hi!

I am a student in University "Paisii Hilendarski" Plovdiv, Bulgaria. Now is my third year of studying Software Technologies and Design. I want to gain some experience in my area and become expert in it. I have always had a lot of ideas for creating websites, making mini project to test my knowledge. A lot of time i have been practicing to get here and try to prove myself. I can't wait for a task to work on! I have studied a lot, made a lot of projects both for back and front-end and i think it is my time to work on some real projects. I am motivated hardworking and reliable person. Technologies have been my passion my whole life.
